

Sport perimeter LED screens and LED displays are also called sport perimeter advertising boards. They are mainly used in advertising around the stadium through the LED screen control system software. The perimeter advertising boards are effective and show continuous advertising messages on the LED screens and LED displays across the entire perimeter of a sport field inside a stadium.

As this field around the display uses 3 in 1 SMD technology, it has a very sharp images and unrivaled viewing angles of over 160 degrees. so it can used for both indoor and outdoor sports field, such as the football field, basket ball court, baseball court and so on.

Vegas LED Screens sport perimeter led displays solution provides it's clients another application choice by some enhancement design. As the bracket can be adjusted together with the LED cabinet, so it can also use as a normal standard LED screen application, and also as a base of sport perimeter led displays, Vegas LED Screens has developed multifunctional LED screens and LED display, it can cover all of your request for your LED display applications.
